RESEARCH INTERESTS

My research interests include LLM agents and multi-agent systems, with a current focus on agent memory, communication, and topology design. I am interested in how these components affect agent performance and efficiency across different tasks. More broadly, I want to understand how agent systems can better adapt their internal state and interactions as tasks become longer and more complex. I am also interested in designing agent systems that are not only capable, but also efficient, reliable, and practical to use.

EDUCATION

University of California, Los Angeles (UCLA) B.S. in Statistics & Data Science; Minor in Data Science Engineering	Expected June 2027 GPA: 3.90/4.00
Nanyang Technological University (NTU), Singapore Associate Degree (Business & Engineering Focus)	2019–2022 GPA: 3.80/4.00

RESEARCH EXPERIENCE

UCLA Natural Language Processing Group Nov. 2025–Present
Undergraduate Research Assistant | Advisors: Prof. Ying Nian Wu, Prof. Kai-Wei Chang

Codebook Agent *Equal First Author*
Investigated amortized topology selection for LLM multi-agent systems; reproduced and instrumented GTD, designed controlled generator/proxy comparisons, audited results, and developed the paper's main analyses and figures.

MEMCON
Implemented and debugged ALFWorld and ScienceWorld evaluation pipelines for adaptive agent memory, ran controlled evaluations, analyzed agent trajectories, and contributed to manuscript framing and revision.

Agent Q-Mix
Contributed to research framing and manuscript development for adaptive multi-agent communication, reviewing the MARL/QMIX formulation, accuracy–efficiency tradeoffs, and adversarial-agent robustness evaluation.

PROFESSIONAL EXPERIENCE

Slipstream (Intra Atria, Inc.) Nov. 2025–Present
AI Product Research & Data Analytics Intern

Prototyped an AI onboarding system with Supabase and 40+ synthetic employee profiles; developed multi-agent task orchestration and analyzed execution failures to refine workflows.

Alibaba Group | *Incoming Research Intern, LLM Agents* Summer 2027

AWARDS & HONORS

Dean's Honors List, UCLA Winter 2026, Spring 2026
Director's List (Top 5%), NTU Academic Years 2019–2020, 2021–2022

TECHNICAL SKILLS

Programming: Python, R, SQL, C++, Java, Bash

ML / Research Tools: PyTorch, scikit-learn, pandas, NumPy, Matplotlib, Jupyter, Git, LaTeX

Systems / Platforms: Linux, AWS, Supabase, Tableau, LLM APIs
